Bleed Area

You will need to extend your design to fill the bleed area. This will be trimmed to make sure you don't have any unwanted white lines.

Cut Line

This is where we aim to cut your design to the finished size. Any part of your design placed outside this area will be cut off.

Safe Zone

The safe zone is 3mm inside the cut line. Make sure all important elements and text are kept within this blue area.

To export your document ready for print:
