**Bleed Area**

You will need to extend your design to fill the bleed area. This area will be trimmed to avoid unwanted white lines appearing during the print finishing stage.

**Trim Line**

This is where we will trim your design to the finished size. Any part of your design placed on or outside this line will be cut off.

**Safe Zone**

The safe zone is 3mm inside the of the trim line. It's advised that all important elements and text are kept within the white area.
